REMOVAL ACTION WORKPLAN APPROVAL, CUDAHY CITY PARK SITE REMEDIATION PROJECT, LOS ANGELES COUNTY, CALIFORNIA

Dear Mr. Perez:

On September 19, 2003, the Department of Toxic Substances Control (DTSC) announced a public comment period for a draft Removal Action Workplan (RAW) document in local newspapers in the City of Cudahy. The purpose of the public comment period was to solicit comments from community members concerning the proposed RAW and its implementation.

On September 24, 2003, a public meeting was held in the City of Cudahy to discuss the proposals outlined in the RAW and also to hear the community's concerns on the project. DTSC responded to several verbal comments from members of the community on the day of the meeting concerning the proposed RAW. The public comment period ended on October 20, 2003. After considering all comments, DTSC finalized the RAW on January 27, 2004.

DTSC would like to thank the City of Cudahy, particularly the City Manager's Office, for assistance in successfully facilitating the community outreach program. DTSC looks forward to implementing with you the approved RAW.

If you have any questions, please call me at (818) 551-2822, or Mr. Jess Villamayor, Project Manager, at (818) 551-2879.

Sincerely,

Sayareh Amir, Chief
Southern California Cleanup Operations Branch – Glendale Office
